RollerAid™ — Comfortable, Stable and Safe

RollerAid easily adjusts for height and weight

"Unlike the so called turning leg scooters, the RollerAid turns in its own length. No more backwards and forwards. And no lifting!"

— Rose Martin, Homemaker
Denver CO

"The RollerAid OTS is so light and folds so small I can take it anywhere — even on a plane."

— Jean French, Sales Manager
Minneapolis, MN

Maintain Your Mobility

With the smallest turning radius, smallest folded volume and lightest weight of any turning leg scooter available, the RollerAid™ is the ideal replacement for crutches, walkers and wheelchairs in your return to weight bearing after lower leg injury or surgery.

The multilayer foam bench and soft grip ergonomic handlebars provide the most comfortable ride possible. The low energy, easy turn caster system, with its "One-Touch Straight" capability, make it easy to move around your home, work or run errands with safety and confidence.

"Thanks to RollerAid, I have little fear of falling. I feel safe and this scooter gives me great mobility."

— Donna Stone, double amputee
Spokane, WA

"This little machine has truly been a blessing. I have nothing but praise for it."

— Frank Taylor, Designer
Philadelphia, PA

"After my foot surgery, RollerAid helped me use my body more fully; I didn't feel like an invalid anymore. The scooter really aided in my recovery time too."

— Eleanore Woolton,
College Professor
Sacramento, CA
